4 Cooperation with other group members

4 Interest and enthusiasm in project

5 Participation in leading/facilitating discussion

4 Ease and familiarity with discussion material

PEER Evaluation (Partner 3: _____):

_____ Participation in developing ideas and planning project

_____ Willingness to discuss the ideas of others

_____ Cooperation with other group members

_____ Interest and enthusiasm in project

_____ Participation in leading/facilitating discussion

_____ Ease and familiarity with discussion material

Self-Reflection

What did you learn from the experience?

I learned a lot about how to integrate multiple people's codes into a single working file. I furthered my knowledge of Python and its capabilities, and I strengthened my teamwork and collaborative skills

What do you think went well?

I think that the way that we divided up the work worked very well, each person knew what they had to work on, so each person was able to focus on their part

What would you have done differently, given the opportunity?

I think that my group could have benefited from meeting in person to discuss our ideas on how to implement certain functions

Do you have any other comments or suggestions about the project?

No, there is no comments or suggestions
